

ROYAL Building Products

Press Release

Laval, Quebec (December 2nd 2011) –Again this year, Royal Building Products was displaying its latest products at the **WINDOOR** Show on November 15, 16 and 17, at the Toronto Metro Convention Centre.

Royal has innovated with a new modern booth structure, assembled with modular aluminum profiles for an open – spacious look design. Requirements for shows change every year and the great flexibility of this new structure allows to adjust the modules easily.

The star of our booth was without any doubt the new Bi-Fold **Overture** Series door.

All the efforts from our technical department to come up with a new booth structure were rewarded as Royal Building Products has won the '**James Parker Best Booth Award**' at the WinDoor Show 2011.
